TDOE Releases 2022-23 District-Level TCAP Results
Local School Communities Demonstrate Academic Gains

NASHVILLE, TN— Today, the Tennessee Department of Education released the 2022-23 Tennessee Comprehensive Assessment Program (TCAP) district-level results, following the release of the [state-level results](#) last month. These results include both Fall 2022 end-of-course (EOC) exams and Spring 2023 exams in English language arts (ELA), mathematics, science, and social studies, and data is presented by subject, grade and student group, and district.

This year, district-level TCAP assessment data is available on a new interactive dashboard on the [State Report Card](#), labeled “2023 District Assessment.” This new section will help students and families, educators, district and school leaders, and policymakers visualize TCAP assessment results and have a better understanding of 2023 TCAP performance. To learn more about how to view district-level data on the interactive dashboard, watch this short overview video [here](#).

“These results reflect the dedication and continuous efforts of Tennessee districts and educators to prepare students and make academic gains,” **said Lizzette Reynolds, Commissioner of Education**. “Using this data to make informed decisions and strategic investments in education, Tennessee is well prepared for the work that lies ahead, and we will continue to put kids first.”

District-level TCAP results are essential to providing a snapshot into each of Tennessee’s school communities. During the 2022-23 school year, students took state TCAP assessments in general education subject areas to collect valuable data and inform strategic decision-making on how to best support the success of all students. Overall, the 2022-23 TCAP student participation rate increased from last year, with 92 districts achieving a 99% participation rate and 29 districts achieving 100% participation rates.

Tennessee's school districts are the best sources of information for characterization of local results because they know their communities best. This release is an opportunity for each school and district community to review their students’ progress after the local implementation of programs, initiatives, and targeted supports that accelerate student academic achievement.

The 2022-23 TCAP district-level data highlights are below, including all subjects and grades tested:

- In 68 districts, over 38.7% of students scored “met expectations” or “exceeded expectations.”
- In 19 districts, over 50% of students scored “met expectations” or “exceeded expectations.”

Cannon County Schools

Woodbury, TN 37190
Phone: (629) 201-4801 Fax: (629) 201-4830

- 132 districts increased proficiency rates from the 2021-22 school year to the 2022-23 school year.
- 107 districts increased proficiency rates from the 2019-20 school year to the 2022-23 school year.

“Cannon County Schools will utilize this year’s TCAP results to drive our goals for the upcoming school year, said Bonnie Patterson, Director of Schools. “We take ownership of our challenges and successes and will take immediate steps toward improvement toward academic success. One such step will include new diagnostic tools to track student performance throughout the year based on grade-level academic standards. We look forward to rising to the challenge as we set our goals to meet or exceed state averages.”

To help Tennessee families and students understand their individual TCAP results, the department’s free online resource, the [TCAP Family Portal](#), provides access to current-year TCAP scores, as well as past years’ test results and additional information for each student. The 2022-23 TCAP results for all tested students are now available in the TCAP Family Portal.

TCAP has been the state’s testing program since 1988, and it includes assessments in math, English language arts, social studies, and science. Tennessee students participate in TCAP testing once a year in grades 3-8 and at the end of certain classes in high school. TCAP assessments are meant to measure how well students have gained the knowledge and skills expected for their subject and grade level, based on the Tennessee state [academic standards](#).
